CPC-3 Menu Hierarchy

The following displays the various menu options within the CPC-3. Additionally, the effects of various navigation buttons are explained based on their effect within that specific menu or submenu. The menus will be the same for Combustion Air and Draft applications, except for the shaded portion of this guide.

General Notes: Hold the SAVE SETTING button for 5 seconds in order to open the keypad from a locked setting. Generally, press the button corresponding to the menu you are in order to exit that menu. Press the enter button in order to exit a submenu and return to a menu.
